GFF strives to exceed client objectives and advance their vision.

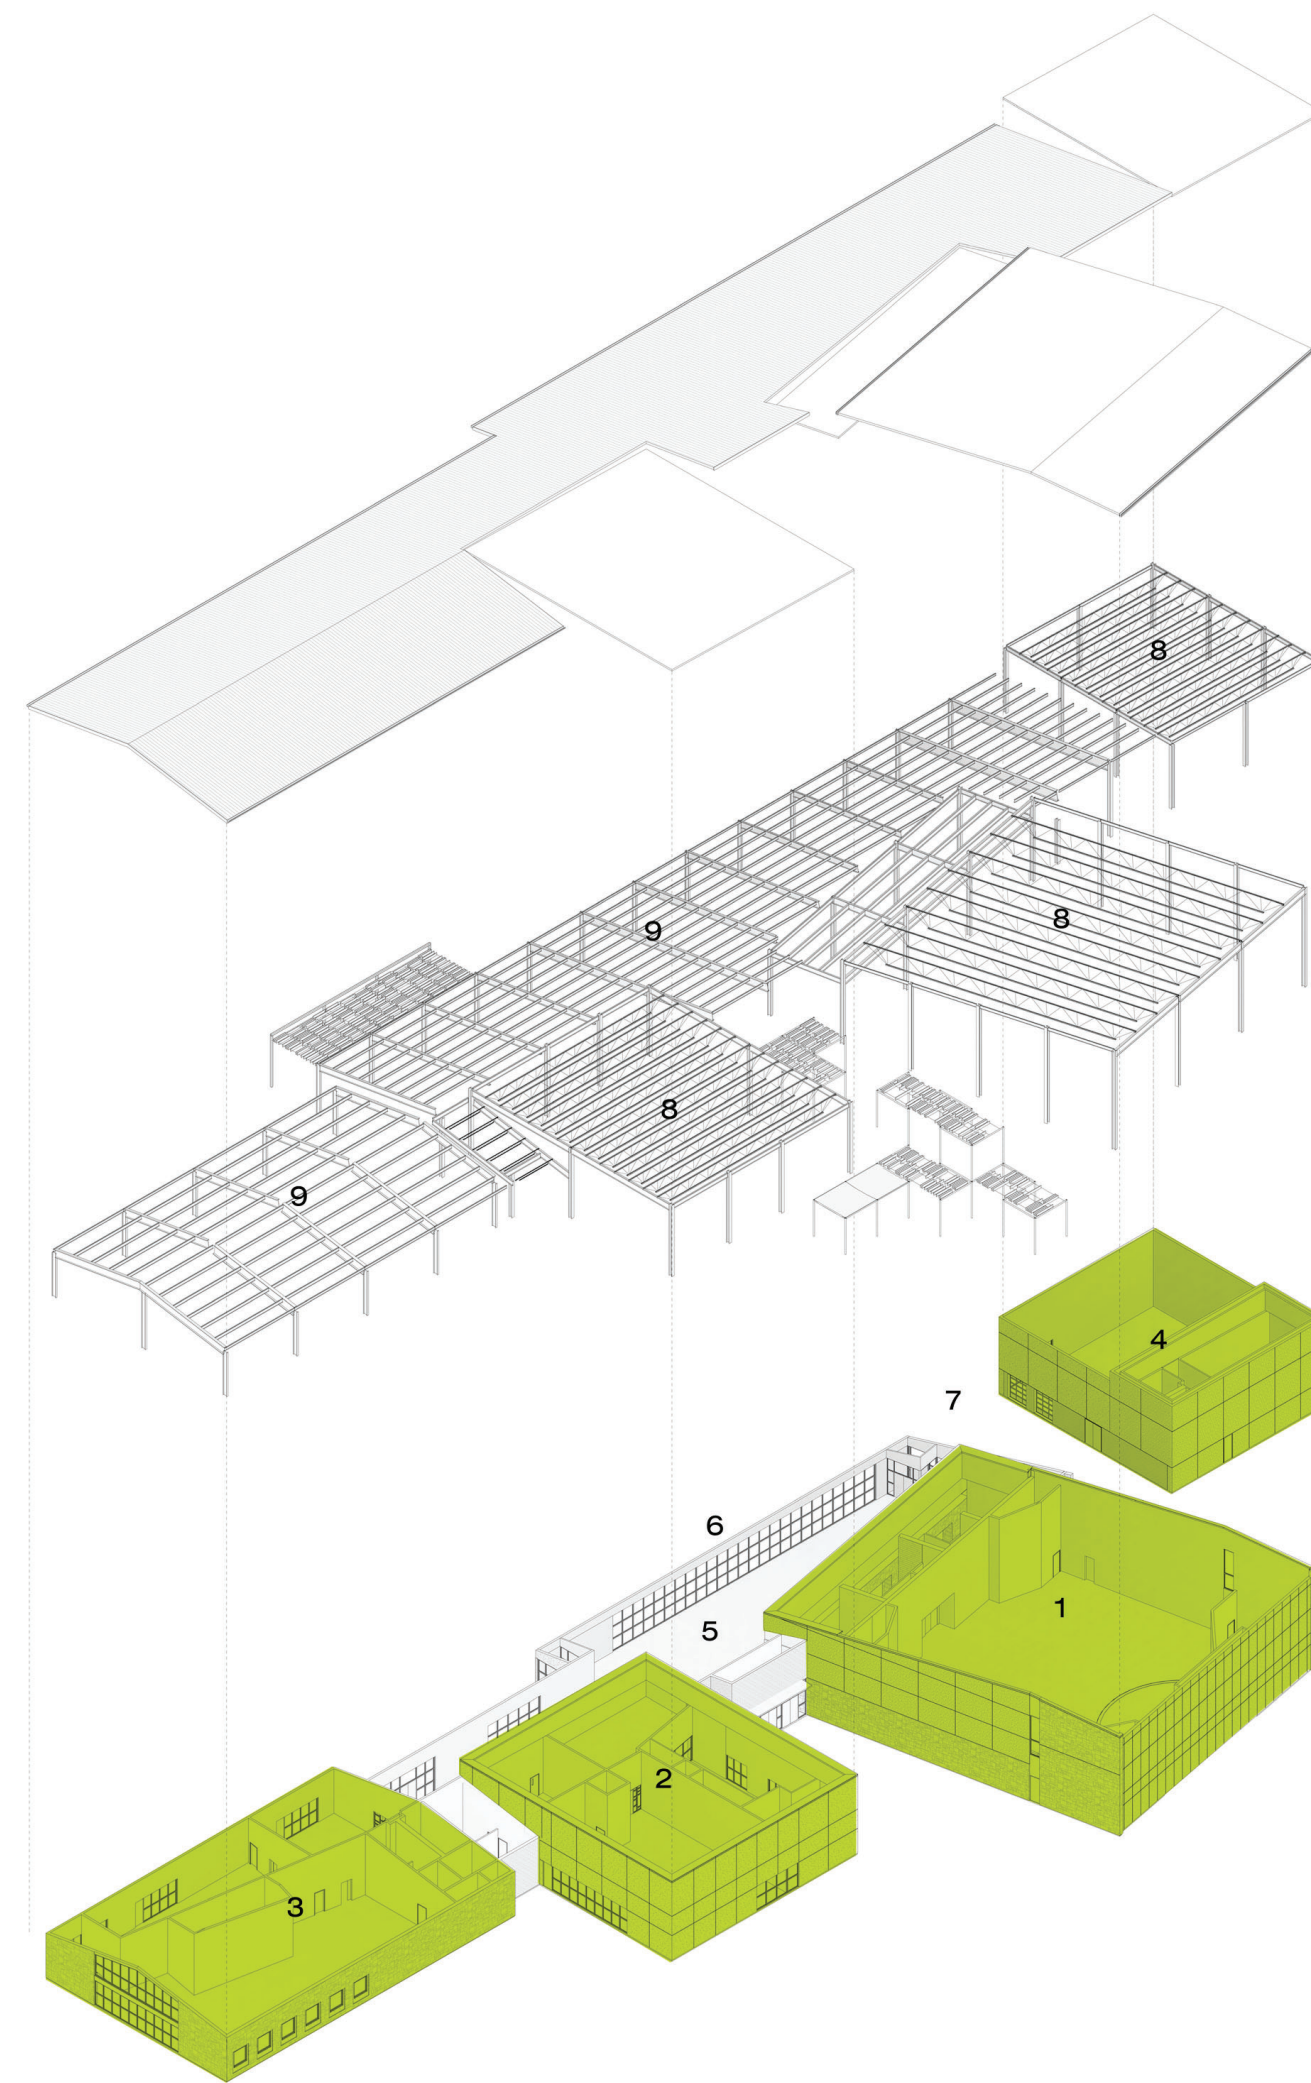

We listen carefully to our clients' goals, needs and wants; distilling these into a design brief that serves as the foundation for every project.

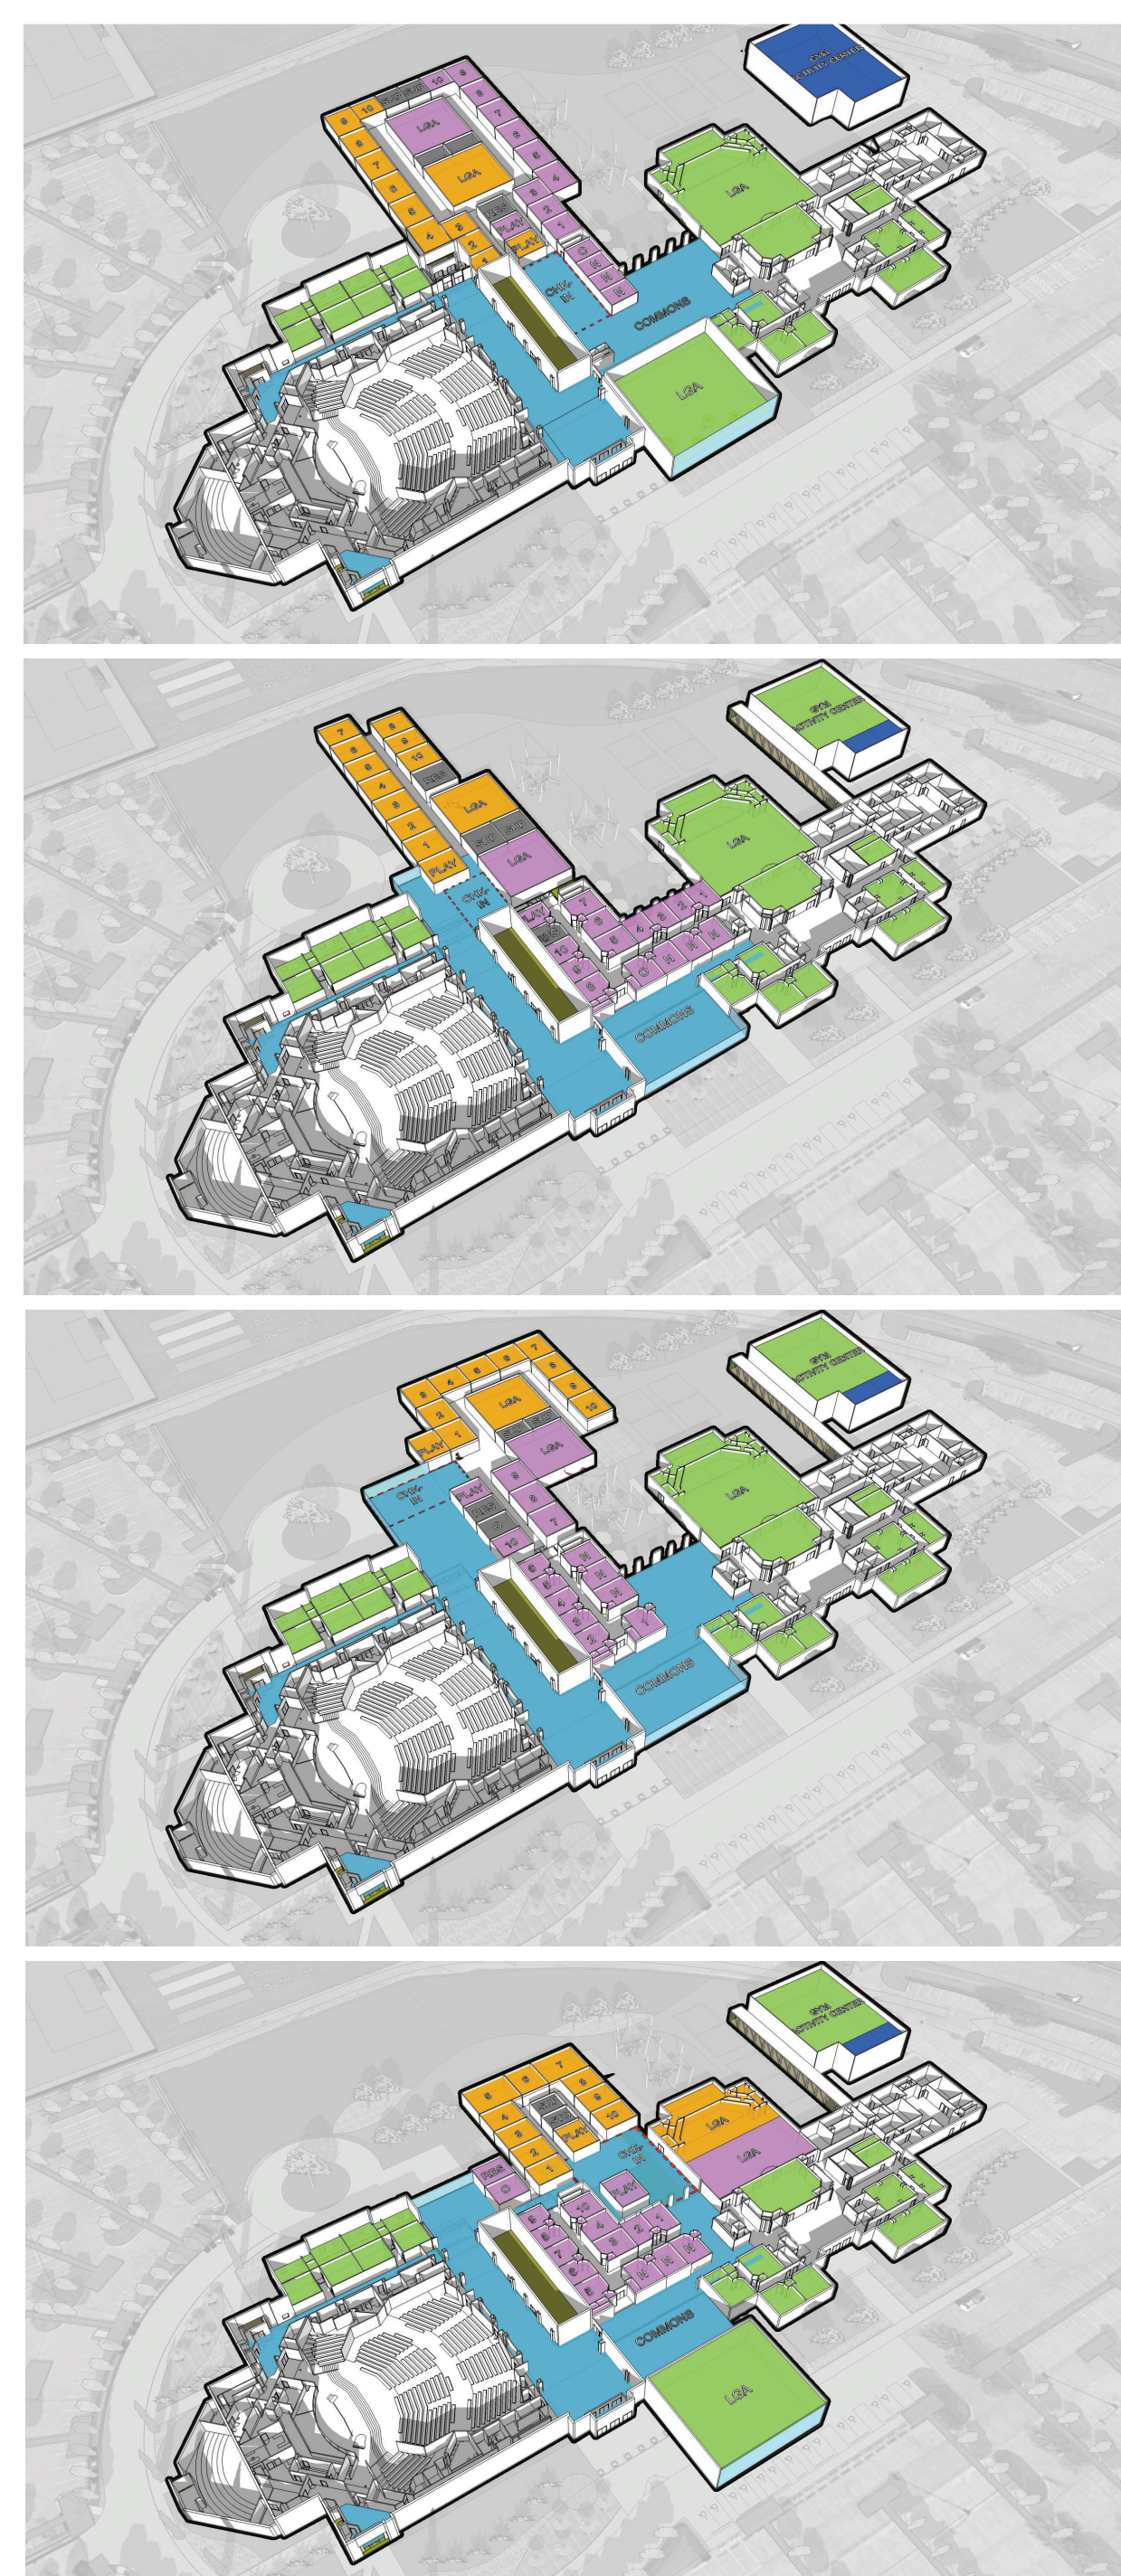

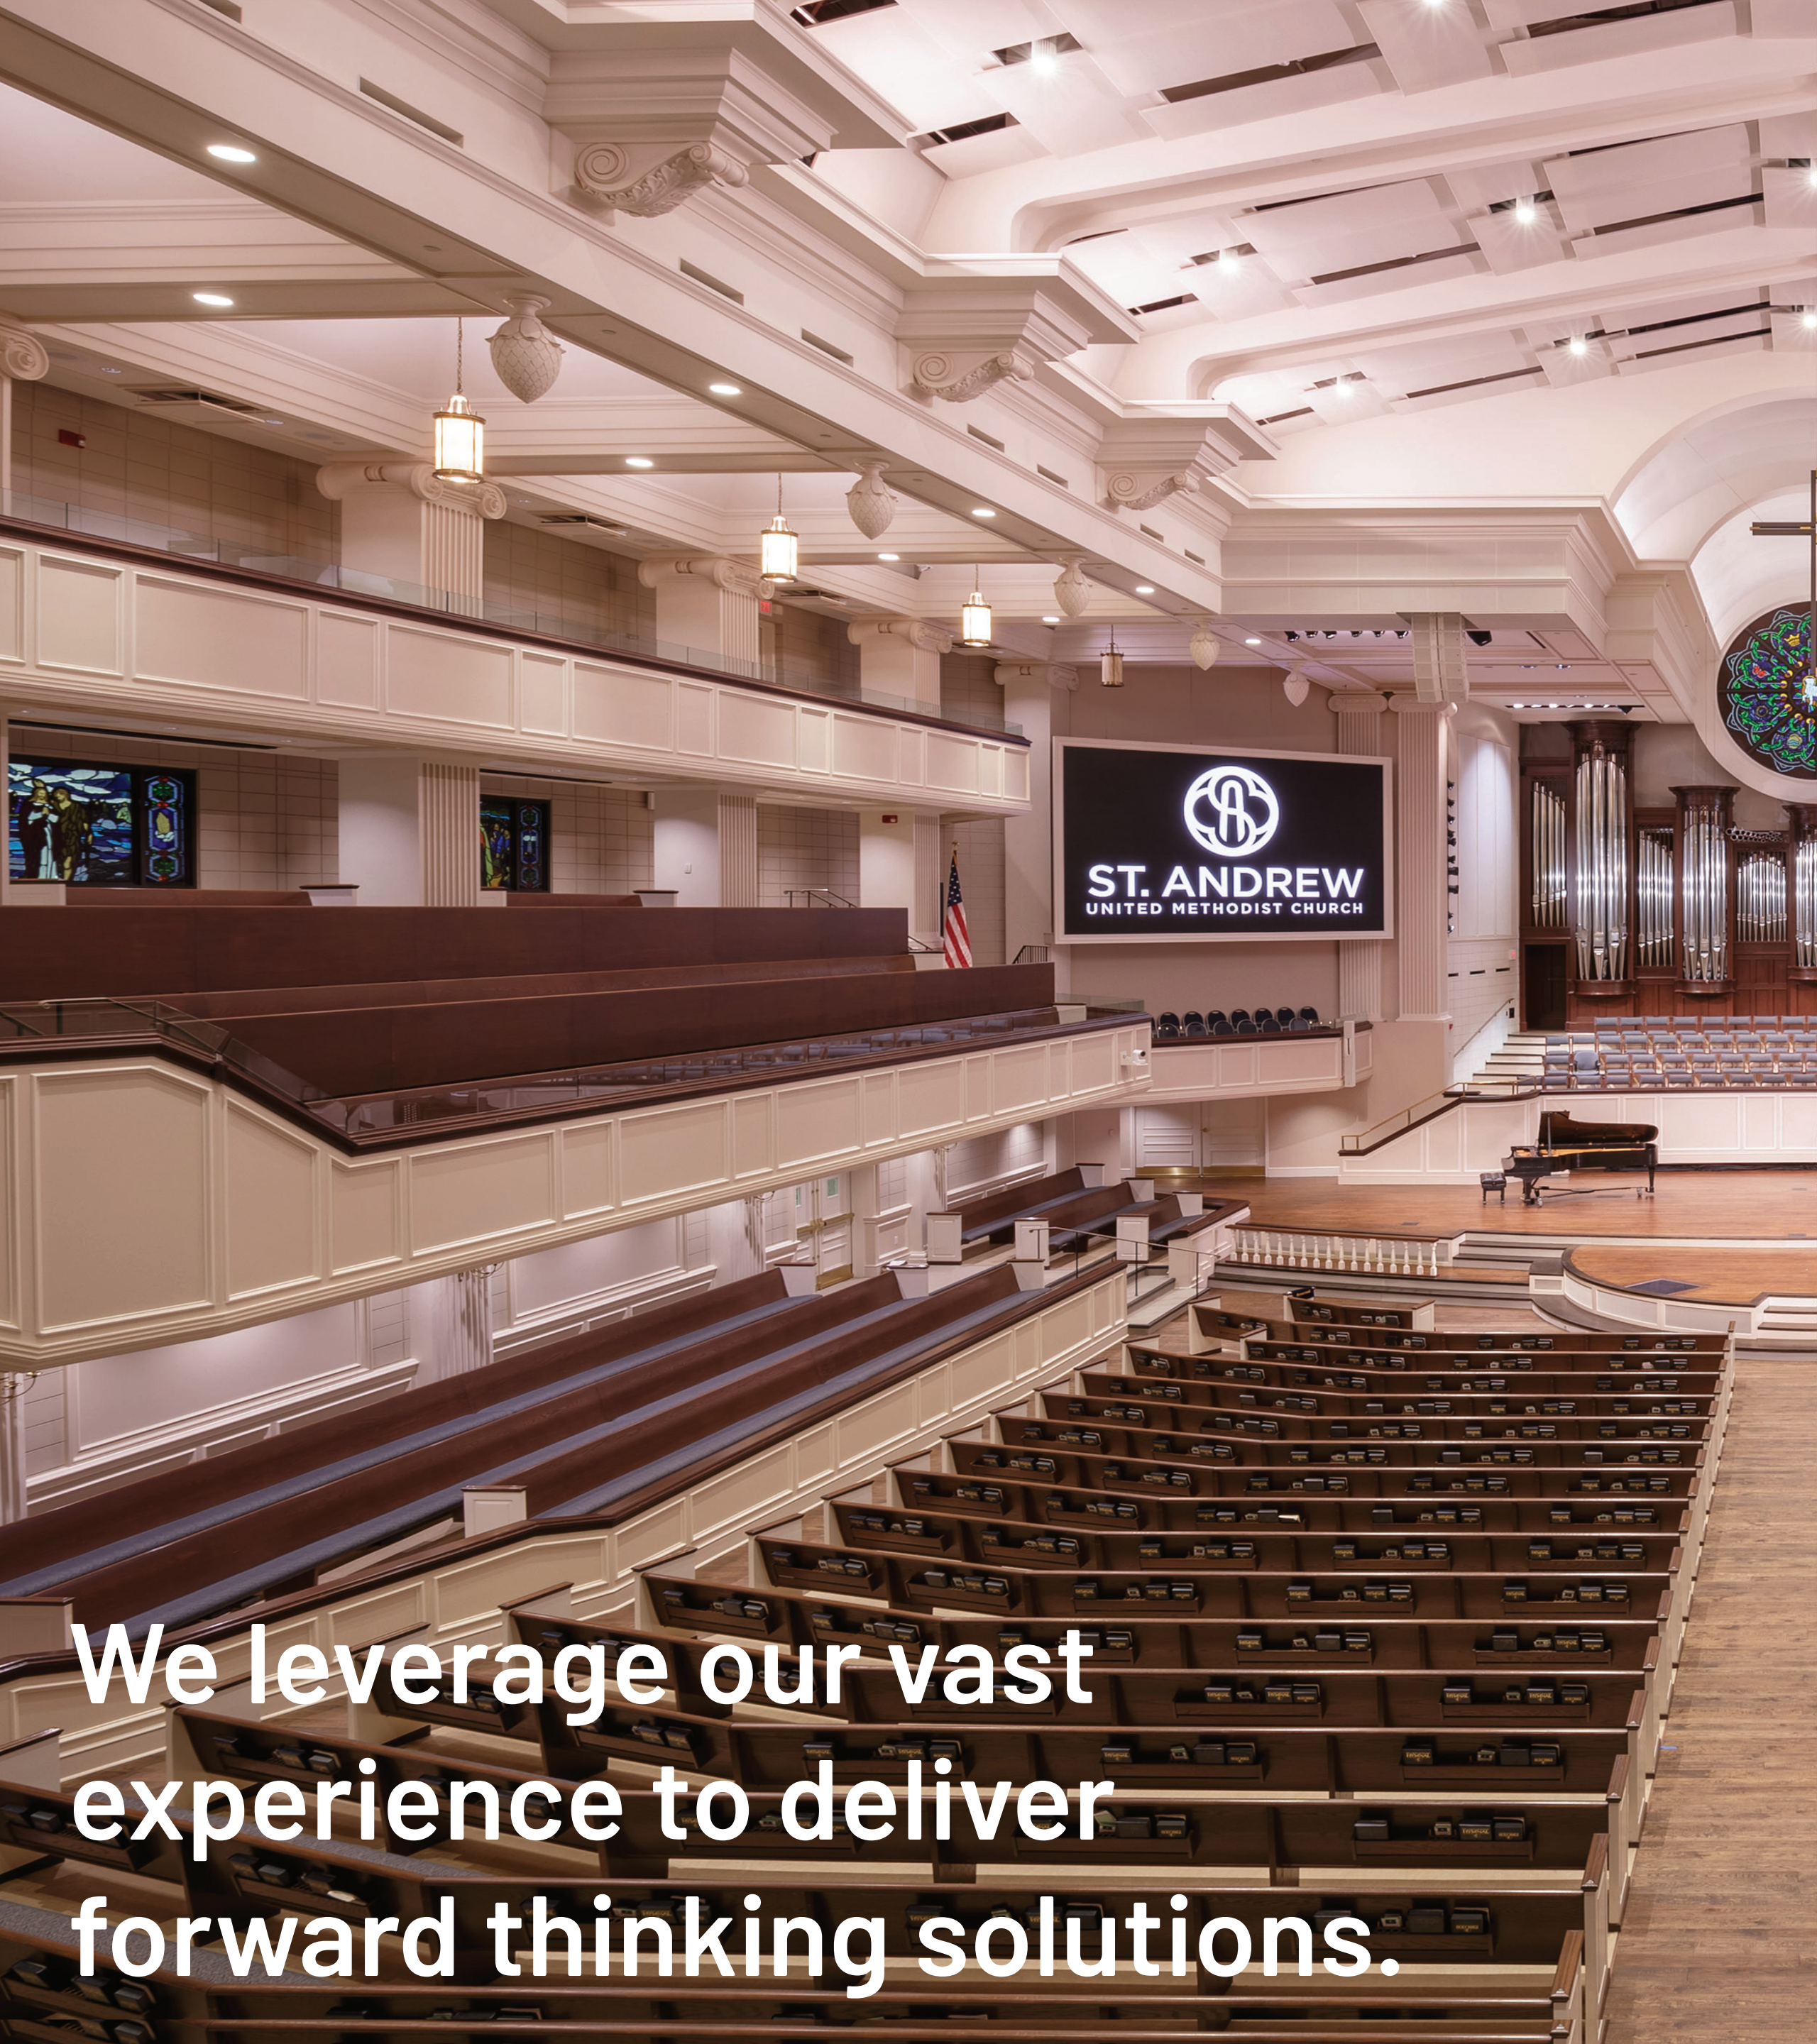

**We work collaboratively  
with our clients; giving  
voice to multiple  
approaches while  
refining them to reveal  
the best idea.**

**We consider different  
strategies, comparing one  
against the other, which  
allows the best option to  
rise to the surface.**

We leverage our vast  
experience to deliver  
forward thinking solutions.

Working with different types of churches  
throughout the country allows us to bring  
cutting edge ideas to all our work.
