

God-Centered Spiritual Transformation

A Model for Youth and Adult Faith Formation Discussion

This is a general guide designed to help small groups shape discussion about matters of faith. It moves from lighter, introductory conversation into deeper, more intentionally spiritual conversation that encourages participants to listen for God speaking to them through the material being studied - scripture, curriculum, video, etc. Then, by sharing, integrating and sending forth, it ends with individuals sent back into the world, continuing to incorporate what they have learned from God and each other.
